RESEARCH SUMMARY

My research interests span to visual analytics, human-computer interaction, and machine learning. More precisely, I seek to understand how interactive visual interfaces may enhance user agency and trust in AI-mediated systems. This includes designing systems to foster creativity and learning, designing novel visualization to interpret decision-making paradigms, and multi-modal interactions (auditory and visual) for sensemaking.

EDUCATION

University of Maryland, College Park, MD, USA *Aug 2020 - Present*
Ph.D. in Information Studies CGPA: 3.95/4
Human-Computer Interaction Lab (HCIL), Advisor: Niklas Elmqvist

Stony Brook University, NY, USA *Aug 2018 - May 2020*
M.S. in Computer Science CGPA: 3.9/4.00
Advisor: Klaus Mueller

University of Dhaka, Dhaka, Bangladesh *2011-2015*
B.Sc. in Computer Science and Engineering CGPA: 3.6/4.00

PROFESSIONAL EXPERIENCE

Research Intern Virtual
Bosch Research, Advisor: Liang Gou *May 2021 - Aug 2021*

Designed an interactive interface to interpret visual concepts learned from a self-supervised model. The interface allows weak supervision for fine-tuning the concepts. We submitted a patent for the project and currently working on writing a paper.

Graduate Teaching Assistant MD, USA
University of Maryland, College Park *Aug 2020 - Present*

Courses: Introduction to Data Visualization; Introduction to Data Science.

Graduate Research Assistant NY, USA
Stony brook University, Advisor: Klaus Mueller *May 2019- Aug 2020*

Projects: Visual causal model for transparent decision making, Collaborative sense-making through causal reasoning; Interactive tool for balancing screentime for characters in a live telecast.
